TILE

The modularity of the pentagonal structure allows it to create infinite patterns and infinite color combinations. The panel, in painted metal, can be a light point or an acoustic corrector. In the most sophisticated version of the lamp, panels with differing functions can be placed next to each other.

Tile

Included bulb

Voltage: 230V, 50/60HZ or 120V, 60 HZ according to the country.

Penta reserves the right to change, better and improve its models without notice, even if these improvements might change the aesthetic appearance of the proposed solutions.

The glass is hand made and mouth-blown by the master glass blower, according to the traditional blowing techniques. Each item is carefully checked, therefore apparent imperfections, such as bubbles or nuances in the glass colour, have to be recognised as merits and signs of the artisan's craftsmanship.

Penta srl takes part in Consorzio Ecolight for the implementation of directive WEEE/RAEE 2002/95/CE e 2003/1087/CE relating to the collection and disposal of light fittings.

The paper used is completely biodegradable and recyclable.

Dimmer

DIMMER: dimmable fixture by means of a switch situated on the lamp structure or on cable (push button, touch, slider control, microswitch)

PHASE CUT: dimmable fixture via remote device suitable to manage TRIAC/IGBT dimmable sources. The minimum load of the dimmer must be verified, compatibility of the dimmer must be verified before installation.

0-10V: dimmable fixture through remote device suitable to manage 0-10V drivers.

ATTENTION: fixture lamps that mount bulbs are phase cut dimmable by means of a remote switch able to manage dimmable sources (retrofit LED bulbs must be dimmable).

Note

Most product-integrated LED sources have a Color Rendering Index (CRI) = 90.

All luminaires can only be sold with the single rosettes shown on the pendants page or with the multiple plates shown on page 132.

The reverse is also true: rosettes and multiple plates cannot be sold separately from pendants.

All fixture are tested and guaranteed in their entirety: pendant + rosette or pendant(s) + multiple plate.

Any unauthorized installation will not be deemed compliant.

Sound-absorbing fabrics with sound-absorbing properties improve the acoustic comfort of the room where they are installed.

For multiple installations it is recommended to use bulbs with the same Correlated Color Temperature (CCT).
